HEALTH ANALYSIS

Personalized Summary & Vital Parameters

Pankaj Singh

Booking ID : 14598648801 | Sample Collection Date : 29/Jul/2025

Pankaj Singh,

Congratulations, We have successfully completed your health diagnosis. This is a big step towards staying on top of your health and identify potential to improve!

10 Vital Health Parameters of a Human Body Ecosystem

Below are the health parameters which require routine checkups for primary healthcare. The view also includes *personalised information* depending on the tests you have taken.

DEPARTMENT OF BIOCHEMISTRY

Vitamin Plus Package

Test Name	Value	Unit	Bio. Ref Interval
-----------	-------	------	-------------------

Calcium - Serum

Serum Calcium	10.4	mg/dl	8.8 - 10.6
---------------	------	-------	------------

Method: Arsenazo

Machine: BECKMAN DXC 700AU

Measurement of calcium is used in the diagnosis and treatment of parathyroid disease, a variety of bone diseases, chronic renal disease, urolithiasis and tetany (intermittent muscular contractions or spasms). Total serum calcium is composed of three fractions: free or ionised calcium, 50%; protein bound calcium most of which is bound to albumin with only a small portion bound to globulins, 45%; and complex-bound calcium, mainly to phosphate, citrate, and bicarbonate, 5%. The ionised calcium is physiologically most significant, but has proven difficult to assay directly. It may be estimated from total calcium given knowledge of the protein content and pH of the blood, which strongly affect the level of ionised calcium. Calcium ions are important in the transmission of nerve impulses, as a cofactor in several enzyme reactions, in the maintenance of normal muscle contractility, and in the process of coagulation. A significant reduction in calcium ion concentration results in muscle tetany. A higher than normal concentration of calcium ions produces lowered neuromuscular excitability and muscle weakness along with other more complex symptoms.

Common causes of decreased value of calcium (hypocalcemia) are chronic renal failure, hypomagnesemia and hypoalbuminemia. Hypercalcemia (increased value of calcium) can be caused by increased intestinal absorption (vitamin d intoxication), increased skeletal reabsorption (immobilization), or a combination of mechanisms (primary hyperparathyroidism). Primary hyperparathyroidism and malignancy accounts for 90-95 % of all cases of hypercalcemia. Values of total calcium is affected by serum proteins, particularly albumin thus, latter's value should be taken into account when interpreting serum calcium levels important source of preanalytical error in the measurement of calcium is prolonged tourniquet application during sampling. Thus, this along with fist clenching should be avoided before phlebotomy.

DEPARTMENT OF IMMUNOLOGY

Vitamin Plus Package

Test Name	Value	Unit	Bio. Ref Interval
-----------	-------	------	-------------------

Vitamin B12

VITAMIN B12	967	pg/ml	222 - 1439
-------------	-----	-------	------------

Method: CLIA

Machine: UniCel DxI 800

Vitamin B12 deficiency frequently causes macrocytic anemia, glossitis, peripheral neuropathy, weakness, hyperreflexia, ataxia, loss of proprioception, poor coordination, and affective behavioral changes. A significant increase in RBC MCV may be an important indicator of vitamin B12 deficiency.

Patients taking vitamin B12 supplementation may have misleading results. A normal serum concentration of B12 does not rule out tissue deficiency of vitamin B12. The most sensitive test for B12 deficiency at the cellular level is the assay for MMA. If clinical symptoms suggest deficiency, measurement of MMA and homocysteine should be considered, even if serum B12 concentrations are normal.

Please note change in Biological Reference interval.

Vitamin D, 25-Hydroxy

VITAMIN D (25 - OH VITAMIN D)	51.86	ng/ml	30 - 100
-------------------------------	-------	-------	----------

Method: CLIA

Machine: UniCel DxI 800

Biological Reference Ranges:

Deficiency	Below 20 ng/ml
Insufficiency	20 - 30 ng/ml
Sufficiency	30 - 100 ng/ml
Toxicity	Above 100 ng/ml.

The assay measures both D2 (Ergocalciferol) and D3 (Cholecalciferol) metabolites of vitamin D. Vitamin D status is best determined by measurement of 25 hydroxy vitamin D, as it is the major circulating form and has longer half life (2-3 weeks) than 1,25 Dihydroxy vitamin D (5-8 hrs).

The reference ranges discussed in the preceding are related to total 25-OHD; as long as the combined total is 30 ng/mL or more, the patient has sufficient vitamin D. Levels needed to prevent rickets and osteomalacia (15 ng/mL) are lower than those that dramatically suppress parathyroid hormone levels (20-30 ng/mL). In turn, those levels are lower than levels needed to optimize intestinal calcium absorption (34 ng/mL). Neuromuscular peak performance is associated with levels approximately 38 ng/mL.

HEALTHIANS LABS

Terms & Conditions:

- 1) Machine Data is available for last 7 days only. In case of manual testing & outsourced testing, machine data will not be available.
- 2) CBC parameters may vary when it is manually reviewed by the Pathologists.
- 3) **For Thyroid tests** - Circulating TSH shows a normal circadian rhythm with a peak between 11pm-5am and a nadir between 5pm-8pm. TSH values are also lowered after food when compared to fasting in a statistically significant manner. This variation is of the order of $\pm 50\%$, hence time of day and fasting status have influence on the reported TSH level.
- 4) **For Lipid profile** - Lipid and Lipoprotein concentrations vary during the normal course of daily activity. Also, certain drugs, diet and alcohol can have lasting effects on Triglyceride levels. To obtain best results for Lipid testing, a strict fasting of 10-12 hours with a light meal on the previous night is recommended.
- 5) Test results released pertain to the specimen submitted.
- 6) Test results are dependent on the quality of the sample received by the Lab.
- 7) The tests are carried out in the lab with the presumption that the specimen belongs to the patient named or identified in the bill/test request form/booking ID.
- 8) The reported results are for information and are subject to confirmation and interpretation by the referring doctor to co-relate clinically.
- 9) Test results may show interlaboratory variations.
- 10) Liability of Healthians for deficiency of services or other errors and omissions shall be limited to the fee paid by the patient for the relevant laboratory services.
- 11) This report is not subject to use for any medico-legal purposes.
- 12) Few of the tests might be outsourced to partner labs as and when required.
- 13) This report is not intended to replace but to lead by providing comprehensive information. It is recommended that you consult your doctor/physician for interpretation of results.
- 14) All reports might not be applicable for individuals less than 18, pregnant women or individuals suffering from diseases for which health test has not been performed or symptoms not diagnosed.
- 15) This report is based on preventive health test screening and is meant for a healthy lifestyle. It does not provide any recommendation for life threatening situations.
- 16) It is strongly recommended to take required precautions for allergic reactions or sensitivities.
- 17) Authorised partner labs as mentioned for certain tests are as below:
 - HL/PL/001- Metropolis Healthcare Ltd
 - HL/PL/002- Thyrocare technologies Limited
 - HL/PL/003- Lifecell International Pvt. Ltd. - Laboratory Services
 - HL/PL/004- Modern Diagnostic & Research Centre

HEALTH ADVISORY

Suggestions for Health & Well-being

Pankaj Singh

Booking ID : 14598648801 | Sample Collection Date : 29/Jul/2025

PHYSICAL ACTIVITY

PHYSICAL ACTIVITY

Physical activities can vary from Regular walks (Brisk or normal), Jogging , Sports, Stretching, Yoga to light weight lifting etc. It is recommended to partake in physical activity at least 30 minutes a day for 3-4 days a week.

If regular workout is difficult, then we can adapt changes such as using stairs instead of lift/escalators and doing household work!

BALANCED DIET

A balanced diet is the key to healthy lifestyle. Include Whole grains, vegetables, whole fruits, nuts, seeds, beans, plant oils in your diet.

It is recommended to always have a high protein breakfast and a light dinner. Avoid items such as processed foods, potatoes and high calorie/sugar products. Don't forget to drink water regularly!

BALANCED DIET

STRESS MANAGEMENT

STRESS MANAGEMENT

Managing stress is an essential part of well-being. Some day to day changes can help such as having sufficient sleep (6-8 hours), indulging yourself in meditation, positive attitude towards lifestyle, using humor, traveling, talking to people whom you feel comfortable with and making time for hobbies by doing what you love to do.

BMI

BMI recommended range is 18.5 to 24.9. Your BMI is 29.35, which is on a higher side.

BMI INFORMATION NOT AVAILABLE
Please fill your Health Karma to know your BMI results
BMI for your body helps prevent many untimely diseases and goes a long way.

BMI CHART

UNDERWEIGHT	NORMAL	OVERWEIGHT	OBSE
Less than 18.5	Between 18.5 - 24.9	Between 25.0 - 29.9	More than 30
*****	*****	*****	*****

Supplement Suggestions

Pankaj Singh

Booking ID : 14598648801 | Sample Collection Date : 29/Jul/2025

In order to fulfill the gaps in nutrition and promote a healthier body we suggest you the following supplements mentioned in the table below:

Suggestions for Improving Deficiencies

IMMUNO-PLUS

Give your immunity a boost the all-natural way.

IMMUNO-PLUS is the perfect all-natural herbal supplement to boost your immune system and strengthens your body's defenses against diseases and infections. IMMUNO-PLUS provides your immune system the necessary reinforcement to keep you safe and healthy.

A weakened immune system opens you to a host of illnesses, such as:

- Recurring Infections
- Heightened Risk of Cancer
- Autoimmune Disorders
- Slow Growth Rate
- Serious Damage to the Heart, Lungs, Digestive Tract & the Nervous System

Infused with the ages-proven goodness of all-natural ingredients, IMMUNO-PLUS is the perfect supplement to strengthen your immune system without having to worry about side effects. Sourced from nature's own pharmacy of herbs, the ingredients in IMMUNO-PLUS present the following benefits:

Amla

Boosts immunity & Stores antioxidants

Jetwatika

Antioxidant properties strengthen the immune system

Aloe Vera

Fights against oxygenated rogue molecules in the blood

Ashwagandha

Reinforces the immune system to increase its fighting ability

Ginger

Anti-inflammatory & antioxidant effects reinforce the immune system

NUTRI-BOOST

Make-up for your missing nutrition the all-natural way!

NUTRI-BOOST is a scientifically formulated and clinically proven all-natural supplement that provides you with essential nutrients that might be missing from your daily diet. With NUTRI-BOOST, give your body the richness of all-natural nutrients and get all the energy you need to keep active throughout the day.

A lack of essential nutrients can lead to serious deficiencies which lead to serious health consequences. Some of the common deficiencies include:

- Iron Deficiency
- Iodine Deficiency
- Vitamin D Deficiency
- Calcium Deficiency
- Vitamin B12 deficiency

Infused with the ages-proven goodness of all-natural ingredients, NUTRI-BOOST is the perfect supplement to fill in the gap of vital nutrients for your body, without having to worry about side effects. Sourced from nature's own pharmacy of herbs, the ingredients in NUTRI-BOOST present the following benefits:

Indian Khajoor

Promotes brain and heart health

Shatavari

Anti-oxidant properties boost the immune system.

Amla

Aids in digestion, and promotes heart & liver health

Wheat

Aids in weight control reduces the risk of heart ailments and provides energy

Jetwatika

Prevents cell damage to keep optimum body functionality

About Healthians Labs

How we control Report Accuracy at Healthians

Quality Control

We follow Quality control to ensure both **precision & accuracy** of patient results.

Machine Data

We save patient's result values **directly from machines** ensuring no manipulations & no fake values.

QR Code

QR Code based authenticity check on all its reports

Calibration

We make use of calibrators to evaluate the **precision & accuracy** of measurement equipment.

Equipment

Our Labs are equipped with state-of-the-art instruments with **cutting edge technology** to provide faster & reliable results.

EQA

Our Labs participate in EQA & show proven accuracy by checking **laboratory performance** through external agency or facility.
